Professional Experience

Celigo Inc., Client Success Group - Custom Automations   **2021-present**
Software Engineer   *San Mateo, CA & Cleveland, OH*

Coordinate the design, build, and management of data integrations between key enterprise systems. Focus on delivering business outcomes through the automation of fundamental processes across client verticals. Leader of organizational initiatives into new ecosystems to support company scaling efforts.

- Engineer integrations and business process automations across leading cloud applications
- Lead advisory and optimization engagements to reinforce Celigo best practices and integrate advanced platform capabilities
- Collaborate with Celigo product engineering teams to further templatize growing integration use cases
- Utilize Celigo platform and web application debugging tools to troubleshoot programming and runtime integration errors
- Coordinate working sessions with client business leaders to translate business requirements into technical documentation
- Engage with client business leaders to encourage upsell and expansion opportunities through client platform demonstrations

Cerner Corporation, Strategic Growth Group - Population Health Cloud   **2015-2021**
Lead Technical Consultant & Solution Engineer   *Kansas City, MO & Cleveland, OH*

Implemented, managed, and developed the Cerner and Salesforce partnership product and connector service, *HealtheCRM*. Designed and configured the integration platform service to connect healthcare client's health information and intelligence from the Cerner Big Data and insights platform, *HealtheIntent*, with consumer engagement insights from Salesforce Health and Marketing Cloud.

Key Roles:
Product Development - Solution Engineer
Managed the design and implementation of Cerner's fastest growing product
- Conducted client forum's and decision worksessions to guide the localized design and configuration of an integration connector for healthcare clients
- Led internal Salesforce org and connected app configuration for improved group productivity

Product Development - Solution Engineer
Advanced product development business initiatives
- Led redesign of the *HealtheCRM* data dictionary to accelerate product training and to clarify solution capabilities
- Refactored client-facing design documentation and collateral for seamless project experience
